Our Mission

“ Accelerate Goals,
Protect assets, and
Achieve a better return on
[technology investment.](#) ”

COMPANY OVERVIEW

Information technology (IT) and security firm focused on delivering operational efficiency and cost-saving on supporting business computing infrastructure. LAB Information Technology Incorporated d.b.a LABUSA enables innovation, growth, and profitability through a robust set of service offerings in - cloud computing, integrated security, and consulting.

Clients are security-conscious and forward-thinking organizations looking to simplify their IT complexity, streamline operation, and reduce cost. LABUSA is the thought leader in deploying custom OpenSource technology that solves business requirements while protecting assets and budgets. The company headquarters is in the metropolitan Houston, Texas area in the United States with an office in Chicago and affiliate partners globally.

Value Statement

We believe that technology should align with business goals, protect, improve, and generate a better return. We help deploy solutions and support that ensures it.

Value Proposition

There are variations of results within every technology solution, from levels of automation to degrees of security. Your unique goals and requirements are at the center of all that we do. We leverage subject matter experts to advise clients on industry best practices and trends. We deliver scalable and cost-effective solutions tailored to you, and your success.

Cloud Managed Services

Deploy, Manage, and Secure Environments

- Technology usage and performance assessment
- Feasibility and total cost of ownership (TCO)
- Design effective topology (Public, Private, Hybrid)
- Build the computing and network infrastructure
- Secure, monitor, and provide operation integrity
- Manage operations and updates within the cloud
- Optimize for performance and usage level changes
- Migrate existing systems and applications to the cloud

LABUSA **Cloud Managed Services** is your support for public, private, or hybrid cloud platforms.

Reducing the labor and frustration in deploying the IT infrastructure and software allows you to focus on the core competencies of your business.

Our strategy is to provide feature-rich, proven solutions in state-of-the-art, fault-tolerant data centers and cloud platforms.

Integrated Security

Integrate physical and information security for visibility and control

- Access control systems (Biometric, RFID, and Password)
- Business disaster analysis and readiness planning
- Central management command centers
- Information and physical security assessment
- Integrated physical, data and network security systems
- IP-Based and analog surveillance systems

LABUSA ***Integrated Security*** protects intellectual and physical assets through streamlined operations.

Our focus is on central management and monitoring of information systems, door locks, cameras, and other security devices.

Our solutions provide you a more significant advantage in mastering your security.

Professional Services

Combine strategy, people, and technology to accelerate goals

- Acquisition and installation of new equipment
- Assistance with a project-based solution
- Augment IT staff with subject matter experts
- Ongoing support and maintenance
- Provide mission-critical day-to-day support
- Training or a knowledge transfer

LABUSA **Professional Services** provides product sales and support in IT and security.

Our technical resources help you get up and running quickly, from new deployments to problem resolutions.

We help prioritize resources and provide a flexible solution to protect investments.

Success Stories

A financial organization incorporates security management policies based on the U.S. Department of Defense security standards.

A leading banking company required improvements to its computing infrastructure. They engaged LABUSA consulting and the subject matter experts leveraged military practices to improve the security profile significantly.

National hotel chain delivers higher level security standards through low cost video surveillance equipment, training, service and support.

When a midsize hotel chain struggled with improving security in their network of nationwide hotels, they turned to LABUSA for support. The team presented a custom platform that enabled the solution and cost savings.

Government agency refreshes the technology and achieves a higher level of security and more functionality.

The U.S. government agency was faced with a limited budget and short timeline, but LABUSA responded with a solution. The team implemented a technology refresh with more functionality and better security.

“LABUSA is a very professional organization; they display the kind of work ethic that we need in all of our future contractors.”

- Director for Policy and Service U.S. Army

“Your (LABUSA) staff is very experienced and knowledgeable. We appreciate the service provided.”

- VP of Technology for Financial Services Company
